

# SmartVent lite

## HOME VENTILATION SYSTEMS

- Economy positive pressure ventilation
- Fresh filtered air from roof cavity to rooms
- Full system control for owners
- Fan speed control for users
- Low to no-noise operation
- Expandable: 2 to 3 rooms
  - 4 to 6 rooms
  - 6 to 10 rooms

**Protect your investment**

Reduce moisture, mould and mildew

# better air = better health

*Almost a third of all rental homes have been found to feel damp*

Ventilation can help prevent moisture and mould buildup occurring by creating and moving clean air to where it is most required.

This can be achieved by either leaving your windows or doors open and simply hoping for the best (passive ventilation), or by using a controlled process which continuously regulates and distributes clean filtered air to selected rooms around your home (active ventilation).

*SmartVent Lite has an added feature to allow property owners to lock the system preventing users from switching it off, while still allowing them to adjust the fan speed*

# SMARTVENT LITE - ECONOMY VENTILATION

SmartVent Lite is an economical ventilation system that monitors temperature conditions to ensure that you are protecting your home or rental property with quality air always circulating.

As a positive pressure system, SmartVent Lite draws in fresher air from the roof cavity and filters it before distributing the clean air into, and around, your home via a network of ceiling diffusers. The air movement created forces the moist, stale air that causes condensation, mould and mildew out of the building.

#### Outside Air

Filtered drier air drawn from the roof cavity or from outside

#### Exhaust Air

Moist, stale air forced out of the home through gaps and openings

*Damp houses are much harder to heat than dry ones and health consequences are well known*

## SMARTVENT LITE - WHAT DO YOU GET

SmartVent Lite systems use proprietary sensor controls designed for New Zealand conditions.

The SmartVent Lite system consists of nude and insulated acoustic ducting and high quality F7 grade filters installed in the roof cavity, ceiling mounted diffusers and an internal wall mounted touch screen controller.

*The touch screen controller is easy-to-use and once the preferred operating temperature is set, the fan speed is automatically controlled. The fan speed can be manually adjusted if required.*

*SmartVent Lite systems are the simple, no fuss way to ventilate your home or rental property*

# THE CLIMATE EXPERTS

## Customer Service

SmartVent has a dedicated customer service team who can offer advice on a wide range of ventilation systems and options for your home. Call our team to book a free in-home assessment.

## In-Home Consultation

A qualified SmartVent consultant can visit you to assess your ventilation needs and specify a SmartVent system designed to create a healthy, comfortable and energy efficient home for you and your family. Consultations are provided free of charge and without obligation.

## Planning Services

If you are building or renovating your home then send our SmartVent technical team your house plans for their consideration and recommendation on the optimum system layout for your home at no charge or obligation.

## Accredited Installers

SmartVent Accredited installers are fully qualified electricians. As knowledgeable SmartVent specialists they will install your system to the highest standards, assuring a quality installation.

All SmartVent systems are backed by a 5-year warranty (excluding filters).
